The power of Aloë Vera

Klambu Horsecare Aloë Vera products contain high concentrations of pure Aloë Vera gel and are made with the greatest care, dedication and using only the best of natural ingredients. In growing and producing we maintain a perfect balance between man and nature.

The secret of Aloë Vera

Aloë Vera originates from the warm climates of Africa. Nowadays it can be found in most warm regions throughout the world. Curaçao is very well known for its Aloë Vera plantations where the best Aloë grows.

Aloë is renowned for its medicinal characteristics and belongs in the 'top ten plants used for healing and cosmetic purposes'. The most important part is the gel-like transparent substance inside the thick leaves. Aloë Vera gel contains more than 75 nutrients. In addition, Aloë Vera contains a complex poly-saccharide which play a very important role in the healing process of damaged cells; activating the immune system whilst also protecting against bacteria and viruses.

The Aloë Vera Klambu Horsecare uses for their products has an exceptionally high concentration of these substances, which can presumably be contributed to the climate on the island in which Aloë Vera thrives.

Pure Aloë Vera Gel Enriched with Tea Tree Oil and Lavender

98 % Pure Aloe Vera Gel is a natural remedy for various skin problems such as insect bites, bruises, equine pastern dermatitis and sweet itch.

It considerably reduces the itching whilst calming and curing the affected area. It is an antiseptic, a moisturiser and stimulant for new cell growth. Can be used on damaged skin or open wounds.

Human & animal

Klambu is suitable for use on both human and animal. For external use only.

2 times daily

Dosage : Apply liberally to the affected skin twice per day.
